Bitfetch Coin (BFC) is a community-driven digital asset built on the BNB Smart Chain (BSC) ecosystem. Our mission is to create a transparent, sustainable, and utility-driven ecosystem where everyday users and large investors alike can participate in digital innovation.

BFC is more than just a token — it is a gateway to premium services, a Play-to-Earn gaming ecosystem, a social rewards platform, and future staking opportunities. Launched in 2026, Bitfetch Coin is committed to building a complete, real-world utility ecosystem backed by transparency and security.

2. Problem & Solution

The current cryptocurrency market is flooded with projects built purely on hype with no real utility, no liquidity security, and centralized control. Bitfetch Coin directly addresses these critical issues.

The Problems:

- ◆ No Real Utility — tokens exist only for speculation with zero use cases
- ◆ Rug Pull Risk — liquidity can be removed at any time by developers
- ◆ Centralized Control — single wallet controls all project decisions
- ◆ Hidden Taxes & Backdoor Functions — investors lose funds unexpectedly
- ◆ No Community Engagement — projects die without long-term participation

The Bitfetch Solution:

Problem	BFC Solution
No Utility	Quiz Game + Social App + Premium Access Platform
Rug Pull Risk	6-Month Liquidity Lock + Verified Contract
Centralization	Renounced Ownership + Fixed Supply
Hidden Tax	Open Source Code + No Hidden Functions

No Community

Airdrop + Giveaway + Reward System
